a = data not applicable because category does not apply; c = too few observations to provide reliable estimates. The calculation of the Länder averages includes those figures; y = data included in other category.

- 1 According to the ISCED classification: International Standard Classification for Education 2011.
- 2 Some data are included in other columns, therefore, in parts the average values of individual education areas are not comparable to the values of others. For more details see source.
- 3 Average of 25 states of the European Union (only OECD countries, partners and/or accession countries of the OECD) after the United Kingdom left the EU. The data were calculated back for the entire time series.
